

# Antidepressants

- Increase Suicidality & Violence
- Addictive
- o Mostly No Better than Placebo
- o Lose "effectiveness" over time
- Cause Mania → Bipolar Diagnoses
  - Explosion of "Rapid Cycling Bipolar Disorder"

Source: Brain Disabling Treatments in Psychiatry, Breggin, Springer, 2008; Anatomy of an Epidemic, Whitaker, 2010.

	Pre-Lithium Bipolar	Medicated Bipolar Today
Prevalence	1 in 5,000 to 20,000	1 in 20 to 50
Good long-term functional outcomes	75% to 90%	33%
Symptom course	Time-limited acute episodes of mania and major depression with recovery to euthymia and a fav- orable functional adaptation between episodes	Slow or incomplete recovery from acute episodes, con- tinued risk of recurrences, and sustained morbidity ove time
Cognitive function	No impairment between epi- sodes or long-term impairment epicodes; long-term impair ment in many cognitive domains; impairment is similar to what is observed medicated schizophred	

# Anticonvulsants Misbranded as Mood Stabilizers

- o Can Cause:
  - Hostility, Aggression, Depression & Confusion
  - Liver Failure
  - Fatal pancreatitis
  - Severe & lethal skin disorders
- May Cause
  - Mild cognitive impairment with chronic use

Source: Brain Disabling Treatments in Psychiatry, Breggin, Springer, 2008

# **Stimulants**

- No convincing evidence of short or long term improvement in cognitive ability or academic performance
- o Brain Damage
- Cardiovascular Harm, including cardiac arrest
- Stunts Growth
- Mania, psychosis, hallucinations
- Agitation

- Aggression
- o Insomnia
- o Depression, suicide
- o Headaches
- Stomach aches
- Obsessive Compulsive Behaviors
- Quadruples Cocaine Abuse Rate
- o Many more

Source: Brain Disabling Treatments in Psychiatry, Breggin, Springer, 2008

# Benzodiazepines

- o Effective for only a few weeks
- Highly Addictive
  - Some People Simply Can Not Get Off Them
- o Can cause mania
- o Can cause violence

• • •

# Medicaid, SSDI & SSI

- o Medicaid Requires People to Be Poor
- SSDI Requires People to Be Certified Permanently Disabled & Permanently Poor
- SSI Requires People to be Disabled & Poor (as relevant here)

## 2003 Budget Summit Report Employment Findings

- Only 1% of Community Mental Health Center clients are receiving employment services from the Community Mental Health Center.
- Less than 1% of people go from SSDI to Employment
- Less than 10% of people on SSI are gainfully employed.

3

# --- | Why? . . .

. . . Is society taking such a harmful, counterproductive approach?

14

# • • •

# Fear and Absolution

- Fear (Violence Myth)
  - People Diagnosed with Serious Mental Illness no More Prone to Violence
- Absolution
  - By Accepting "Medical Model," No one is Responsible

# Other Factors

- Social Control
  - It is Not the Thinking, but Disturbing Behavior
- FDA Abdication/Capture by Industry
- Magic Pill/Drug Culture
- o Psychiatry's Drive for Legitimacy
- o Big Pharma Corruption of Research

16

# The Medical Model, The Hunger Strike and the APA

- 2003 Hunger Strike Challenged American Psychiatric Ass'n to provide reliable scientific evidence of Medical Model and APA essentially admitted it could not.
- Query: Does a headache demonstrate an aspirin deficiency?
- Largest "experiment" demonstrated not genetic.

Stabilization?
Dependency?

18

## 2003 Budget Summit Report Recommendations

- Funding Should Be More Explicitly Tied to Desired Results
- Medicaid/SSDI/SSI Should Be Re-Tooled as Possible to Achieve Desired Results
- The Planning Committee Should Review Whether the Current Level of Reliance on Psychiatric Medications is leading to Desired Results.

Five-Year Outcomes for First-Episo de Psychotic Patients in Finnish Western Lapland Treated with Open-Dialogue Therapy

Patients (N=75)		
Schizophrenia (N=30)		
Other psychotic disorders (N=45)		
Antipsychotic use		
Never exposed to antipsychotics	67%	
Occasional use during five years	33%	
Ongoing use at end of five years	20%	
Psychotic symptoms		
Never relapsed during five years	67%	
Asymptomatic at five-year followup	79%	
Functional outcomes at five years	3.00.0	
Working or in school	73%	
Unemployed	7%	
On disability	20%

# The Soteria Project

#### Study

First-episode schizophrenia patients treated conventionally in a hospital setting with drugs versus treatment in the Soteria House, which was staffed by non-professionals and involved no immediate use of antipsychotic medications. Results are from 1971-1983 cohorts, with 97 patients treated conventionally and 82 patients treated in Soteria House.

#### Results

At end of six weeks, psychopathology reduced comparably in both groups

At end of two years:

Soteria patients had better psychopathology scores Soteria patients had fewer hospital readmissisions Soteria patients had higher occupational levels

Soleria patients had higher occupational levels

Soteria patients were more often living independently or with peers

#### Antipsychotic Use in Soteria Patients

76% did not use antipsychotic drugs during first six weeks

Only 19 % regularly maintained on drugs during follow-up period

J Nerv Ment Dis 1999; 187:142-149 J Nerv Ment Dis 2003; 191: 219-229

#### The Long-Term Benefit of Exercise for Depression

Treatment During First Four Months	Percentage of Patients in Remission at End of Four Months	Percentage of Remitted Patients Who Relapsed in Six-Month Followup	Percentage of Patients Depressed at End of Ten Months
Zoloft alone	69%	38%	52%
Zoloft plus exercise therapy	66%	31%	55%
Exercise therapy alone	60%	8%	30%

In this study by Duke researchers, older patients with depression were treated for 16 weeks in one of three ways, and then followed for another six months. Patients treated with exercise alone had the lowest rates of relapse during the following six months, and as a group, they were much less likely to be suffering from depressive symptoms at the end of 10 months. Source Balyak, M. "Exercise treatment for major depression." Psychosomatic Medicine 62 (2000):633-8, 100-11.

# Children & Youth Without Any Credible Scientific Support: 1 in 23 on stimulants (3.5 million) No long term benefit; short term benefit mainly for adults 1 in 40 on antidepressants Prozac Boys Study: 23% developed manic like symptoms; 19% more drug induced hostility Bipolar Rate soars From close to none in 1995 to 800,000 by 2003 Then come the neuroleptics & anticonvulsants misbranded as mood stabilizers. A little Over 1% Now on Neuroleptics, even some six month olds. Child MH Disability Rate Soars from Essentially Zero in 1987 to 600,000 by 2007.

Why?
 Drug Companies Targeted Children & Youth Market
 Many Financial Incentives to Drug Poor Children & Youth (On Medicaid)
 Schools
 Foster Parents
 Psychiatrists
 Disempowered parents
 God Help Foster Children & Youth

Most Psych Drugs Given
Children & Youth Through
Medicaid is Fraud

• Prescriptions are Medicaid Fraud if not for
a "medically accepted indication,"
meaning, one that is either approved by
the FDA or "supported by citations" in one
of three drug compendia, including
DRUGDEX

• Anyone Can Sue On Behalf of
Government to Recover for the Fraud and
share in the recovery, if any.

\$ Billion Drug Company Settlements
Haven't Stopped Psychiatric Drugging
of Children & Youth

• \$1.4 Billion Lilly—Zyprexa (2009)
• \$2.3 Billion Pfizer, including Geodon (2009)
• \$520 Million AstraZeneca—Seroquel (2010)
• \$258 Million Janssen—Risperdal (2010)
• \$313 Million Forest Labs—Celexa & Lexapro (2010)
• Cost of doing business.
• Caps Liability
• Doctors Still Prescribing It
• Medicaid Still Paying

# Senate Investigation/GAO Report

- o PsychRights Proposing (Briefing Paper to Sen.
  - Announce that outpatient psychotropic drug prescriptions for use in children and youth that are not for medically accepted indications are not covered under Medicaid, and will no longer be reimbursed; except
  - Where abrupt withdrawal from drugs that are not for medically accepted indications can cause serious problems, then allow reimbursement for responsible tapering; and
  - Grant amnesty from False Claims Act liability for all past prescriptions that are not for medically accepted indications.

# Responses: **Program Evaluation Criteria**

#### Department of Health & **Social Services**

- Amount of Services
  - provided (Money Spent) The more disabled people & more money spent on them, the more successful the program(s)
- Quality of Beneficiaries' Lives

# Responses: Programmatic

#### Department of Health & **Social Services**

Not Changing Paradigm

of Care, but

- Grudgingly Allowing Some Non-Drug Alternatives
- Consulting with Marty Irwin some on children & youth drugging

- Funding
  - Peer Support Consortium
  - Soteria-Alaska
  - CHOICES, Inc.
  - Other Peer Programs
  - Locking Children Up & Drugging them in Alaska, rather than Outside ("Bring the Kids Home")

### **Progress**

- o CHOICES, Inc.
- o Soteria-Alaska

# CHOICES, Inc. & Soteria-Alaska

#### CHOICES, Inc.

- Opened in 2007
- "Consumer" Run
- Non-coercive, Nondrug (& drug) Choices In Community
- Available for people in the system a long time

#### Soteria-Alaska

- · Opened in June of 2009
- Goal: Replicate Original Soteria-House
- So Far: Drug Withdrawal Program, not First Episode
- Non-coercive

# PsychRights Strategic Litigation (Adults)

- Force System to Honor People's Rights
- Change Path of Least Resistance
- Help Create Environment Supportive of Non-Drug Choices

# Goals

- Substantially Increase Recovery Rate after diagnosis of Serious Mental Illness
- Substantially Reduce If Not Eliminate Force
- System Support of People's Non-Medication Choices
