Wayne,
My unofficial count is at least 7. 4 as of 1/31 and 3 cases this year.
Martin

Chip,

How current must the data be? Through January 31, 2002 there were 3 deaths associated with DM. Since that time there have been others, but I don't have an exact count.

Kind regards,
Wayne

Wayne,

I know you're busy but I am preparing to deliver a talk next week about glucose, Diabetes, and atypicals. Martin Brecher suggested I contact you to get the latest numbers on reported Seroquel deaths which might have possibly been Diabetes-related.

Your prompt help is much appreciated.
