Marianne:

Karen is correct. There was a conflicting meeting, that we just were informed about, scheduled on June 29th (an efficacy meeting) that requires Ron Leong's attendance, the US Drug Safety VP (our Chairman for SERM), our Surveillance executive director, and Martin Brecher's (MSD) attendance. All of these individuals are required attendees at SERM. We apologize for any inconvenience and realize that any date we set at this point may not accommodate everyone's schedule. Thanks for your cooperation.

Many thanks,

Suzanne Elliott, MS, BS, RN
Safety Surveillance Product Manager, CV

Marianne,

My understanding is that several people (Ron included) have been asked by Glenn to participate in a meeting being held on June 29th. But that is all I know.

Kind regards,
Karen

Dear Karen and Ron,

May I ask for the reason to re-schedule the SERM for Seroquel? If we move it into July it might interfere with the vacation period when it comes to the review and finalisation of a CDS update.

Kind regards,
Marianne
