Subject: Delayed desicion regarding Diabetes and Glucose issue

Dear all,

I just spoke to Wayne MacFadden the physician who is leading the diabetes and glucose issue,

he had a meeting with a expert in this area, Monday this week, to confirm our strategy regarding monitoring of blood glucose and HbA1c, but the expert we consulted did not agree so now we need more discussion before we can give you all a final decision,

No timeplan is in place yet of when this issue will be solved, and we know many of you are waiting to get this solved to get into your protocols before they are finalised,

Also we are waiting for legal and regulatory final decisions in this issue,

Please be patient, the team is working as fast as they can,

I will come back to you as soon as I know anything more,

Regards,

Martin
