Subject: SERM

Folks,

Here are the conclusions of the SERM all of which I supported:

1. Diabetes mellitus, diabetic ketoacidosis, non-ketotic hyperosmolar coma, hyperglycemia-
Keep issue under review
2. Weight gain- Remove qualifying word "limited" from CDS.
3. Oculogyric crisis- EPS including oculogyric crisi to be studied further and discussed at next SERM.
4. Hypertension- No change in CDS
5. Hypersensitivity- Add to adverse events section statement that rare cases of hypersensitivity including angioedema have been observed. This change to be implemented in the next 8 weeks.

Martin
