Dear Alaska Mental Health Trust Authority:

NAMI Alaska supports the application of Psych Rights to the Trust Beneficiary Group Initiatives RFP. We believe that Alaska needs a full spectrum of services for its people with mental illness.

We believe in the evidence based practice of consumer and family peer support and services and we know that the growing movement in Alaska and the current success of these projects is effectively improving the quality of life for Alaskan beneficiaries, and is a top Trust priority. We are requesting full funding from the Trust for all the applications that meet the grant requirements.

Thank you for supporting these important programs with Trust funds.

Sincerely;

Jeanette Grasto
President

Alaska's Voice on Mental Illness
