

The Report on
Improving Mental Health Outcomes
and its
Implications
for the
PAIMI* Program

by James B. (Jim) Gottstein, Esq.

*Protection and Advocacy for Individuals with Mental Illness Act

About Me

- Hospitalized for a month in 1982
- Lucky Not to Have Been Made Permanently Mentally Ill
-  [Video: Escape from Psychiatry: Jim Gottstein's Story](https://youtu.be/Q-ancdxr268)
<https://youtu.be/Q-ancdxr268>
- Founded Law Project for Psychiatric Rights (PsychRights) in 2002

Mission:

Mount a Strategic Litigation Campaign
Against Forced Psychiatric Drugging and
Electroshock

REPORT
ON
IMPROVING
MENTAL HEALTH
OUTCOMES

James B. (Jim) Gottstein, Esq.; Peter C. Gøtzsche, MD;

Available at PsychRights.org

- Psychiatric Imprisonment Massively Associated with Suicide
- Psychiatric Drugs Increase Harm to Self & Others
- Psychiatric Drugs Shorten Life Spans by 20-25 Years
- Psychiatric Drugs Reduce Recovery Rate from Possible 80% to 5%
- Catastrophically diminish quality of life
- Are Proven Effective, Safe & Non-Coercive Approaches

While this is 8 times better than staying on them (40% vs. 5%), it is half of what can be achieved by avoiding the use of neuroleptics in the first place (80%), as established by the Open Dialogue and Soteria House studies.⁸ **This demonstrates the importance of avoiding the use of neuroleptics in the first place.** In addition to their lives being so much better, allowing 16 times more people to recover not only saves a tremendous amount of treatment expense, it converts people who would otherwise be receiving life-long publicly paid services and transfer payments into productive, taxpaying citizens.⁹

The Harrow and Jobe results were so unexpected and contrary to mainstream psychiatry's beliefs that other explanations were proposed, such as it was the people with the best prognosis in the first place who got off the drugs and therefore had better outcomes, that additional analysis was undertaken. None of the alternate explanations proved correct.¹⁰

In addition to dramatically reducing the recovery rate, **the ubiquitous use of psychiatric drugs is extremely harmful physically, reducing lifespans by 20 years or so.**¹¹ In a given time period, the relative risk of dying increases markedly with the number of neuroleptics the person takes.¹² Neuroleptic users have an increased risk of cardiac mortality, all-cause mortality, and sudden cardiac death compared to psychiatric patients

⁸ While there might not be a 100% overlap between the 80% who recovered and the 80% who were not taking the neuroleptics long term, clearly minimizing the use of the neuroleptics produces dramatically better outcomes.

⁹ The best book to understand the impact of psychiatric drugs in general, not just the neuroleptics, is [*Anatomy of an Epidemic: Magic Bullets, Psychiatric Drugs, and the Astonishing Rise of Mental Illness in America*](#) (2010) by Robert Whitaker, from whose work this section is largely drawn.

¹⁰ Harrow, Martin; Jobe, Thomas H.; & Faull, Robert N. (2012). ["Do All Schizophrenia Patients Need Antipsychotic Treatment Continuously Throughout Their Lifetime? A 20-Year Longitudinal Study."](#) *Psychological Medicine* 42(10): 2145–2155; Harrow, Martin; & Jobe, Thomas H. (2013). ["Does Long-Term Treatment of Schizophrenia With Antipsychotic Medications Facilitate Recovery?"](#) *Schizophrenia Bulletin* 39(5): 962–965; Harrow, M.; Jobe, T. H.; & Faull, R. N. (2014). ["Does Treatment of Schizophrenia With Antipsychotic Medications Eliminate or Reduce Psychosis? A 20-Year Multi-Follow-up Study."](#) *Psychological Medicine* 44(14): 3007–3016; Harrow, Martin, et al. (2017). ["A 20-Year Multi-Followup Longitudinal Study Assessing Whether Antipsychotic Medications Contribute to Work Functioning in Schizophrenia."](#) *Psychiatry Research* 256: 267–274; and Harrow, Martin; & Jobe, Thomas H. (2018). ["Long-Term Antipsychotic Treatment of Schizophrenia: Does it Help or Hurt Over a 20-Year Period?"](#) *World Psychiatry* 17(2): 162–163; Harrow, Martin; Jobe, Thomas H.; & Tong, Liping. (2022). ["Twenty-Year Effects of Antipsychotics in Schizophrenia and Affective Psychotic Disorders."](#) *Psychological Medicine* 52(13): 2681–2691.

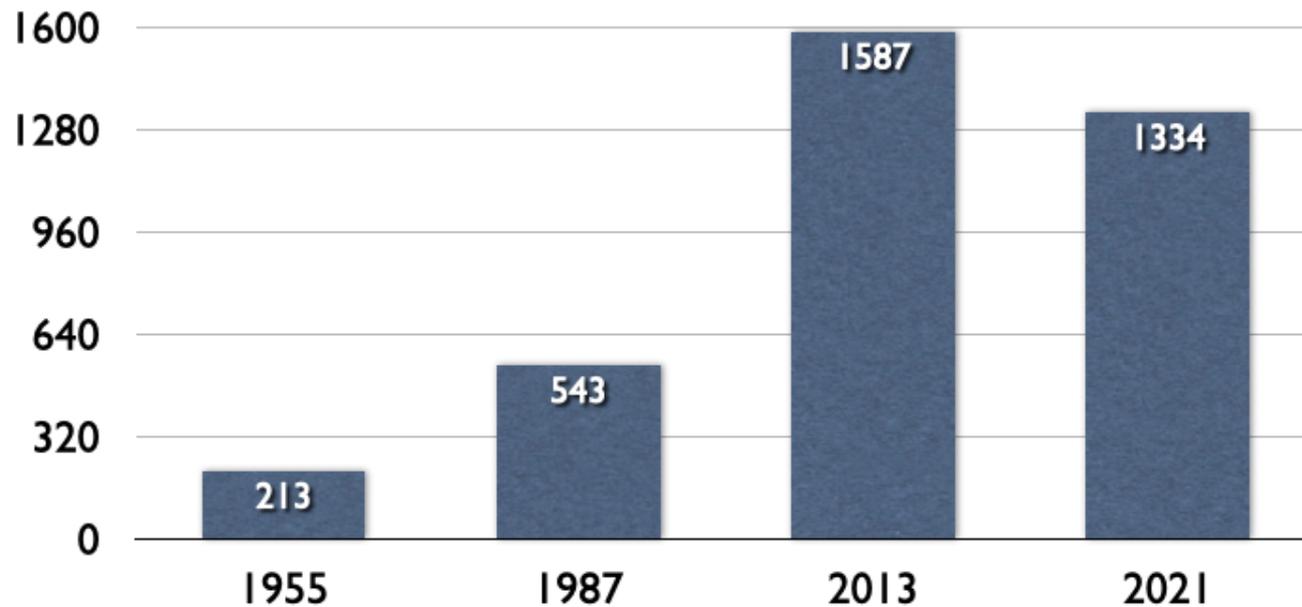

¹¹ Gøtzsche, Peter C. (2015), ["Deadly Psychiatry and Organized Denial"](#), p. 165, et. seq. (Copenhagen: People's Press). See also Parks, Joe, et al. (2006), ["Morbidity and Mortality in People With Serious Mental Illness"](#) (Alexandria, VA: National Association of State Mental Health Program Directors). The report documents mortality in people diagnosed with serious mental illness in the public mental health system has accelerated to the point where they are now dying 25 years earlier than the general population. The report does not attribute this to psychiatric drugs, but it is clear the major change is the advent of the second generation neuroleptics, and the great increase in polypharmacy.

Long-term Recovery Rates for Schizophrenia Patients on Antipsychotics

(Martin Harrow's study)

Outcomes in Select Studies from Pre-Antipsychotic Era

(Patients diagnosed as insane, schizophrenic or psychotic)

Study	Time	Good Outcome*
York Retreat	1796-1811	70%
Worcester Asylum	1833-1846	65%
Pennsylvania Hospital	1841-1882	45% to 70%
Warren State Hospital	1946-1950	73%
Delaware Hospital	1948-1950	70%
Boston Psychopathic Hospital	1947-1952	76%
Norway	1948-1952	63%
California FEP study	1956 (no neuroleptics)	88%

* Good outcome = discharge from hospital, or living in community at end of study period

Five-Year Outcomes for First-Episode Psychotic Patients in Finnish Western Lapland Treated with Open-Dialogue Therapy

Patients (N=75)	
Schizophrenia (N=30)	
Other psychotic disorders (N=45)	
Antipsychotic use	
Never exposed to antipsychotics	67%
Occasional use during five years	33%
Ongoing use at end of five years	20%
Psychotic symptoms	
Never relapsed during five years	67%
Asymptomatic at five-year followup	79%
Functional outcomes at five years	
Working or in school	73%
Unemployed	7%
On disability	20%

Source: Seikkula, J. "Five-year experience of first-episode nonaffective psychosis in open-dialogue approach." *Psychotherapy Research* 16 (2006):214-28.

Soteria-House Study

At six weeks, psychopathology reduced comparably in both groups.

At two years:

- Soteria patients had better psychopathology scores
- Soteria patients had fewer hospital readmissions
- Soteria patients had higher occupational levels
- Soteria patients were more often living independently or with peers

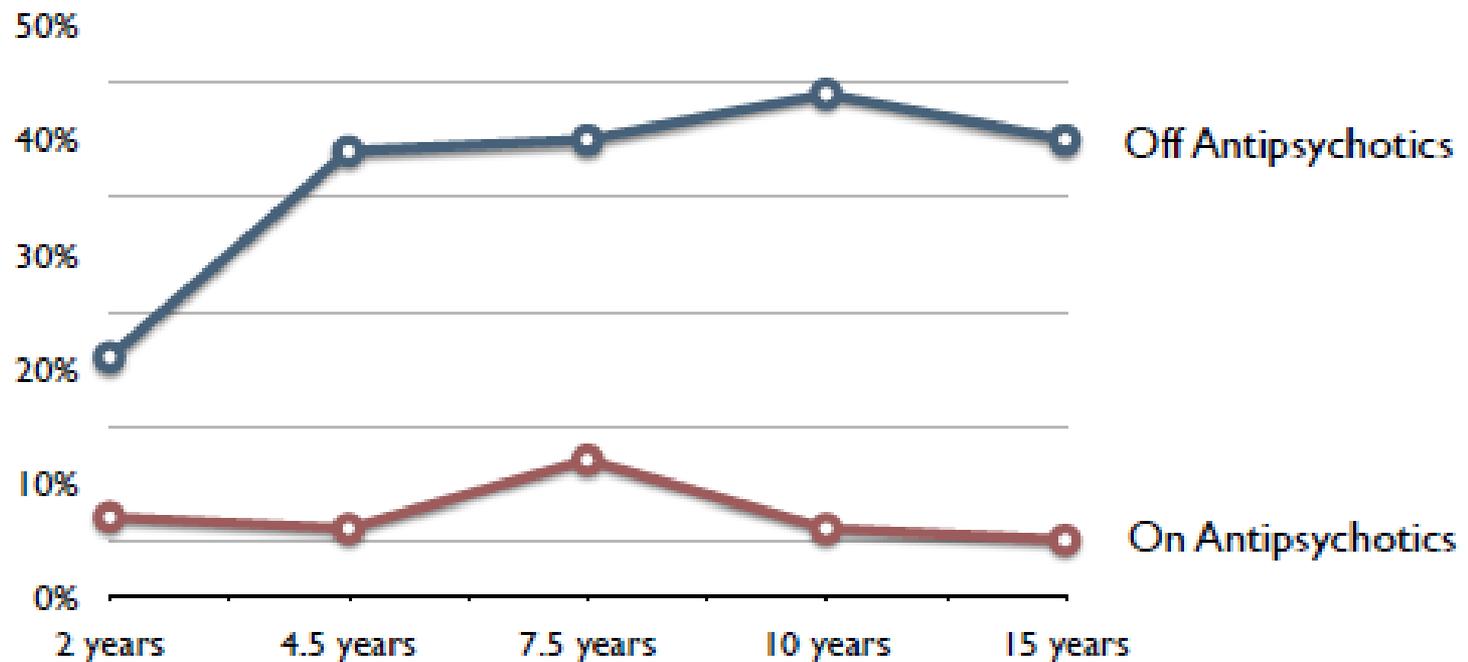

Neuroleptic use in Soteria patients:

- 76% did not use antipsychotic drugs during first six weeks
- 42% did not use any antipsychotic during two-year study
- Only 19% regularly maintained on drugs during follow-up period

PAIMI Act--Purposes

42 U.S.C. § 10801

(b) The purposes of this chapter are--

(1) to ensure that the rights of individuals with mental illness are protected; and

(2) to assist States to establish and operate a protection and advocacy system for individuals with mental illness which will--

(A) protect and advocate the rights of such individuals through activities to ensure the enforcement of the Constitution and Federal and State statutes; and

(B) investigate incidents of abuse and neglect of individuals with mental illness if the incidents are reported to the system or if there is probable cause to believe that the incidents occurred.

Involuntary Commitment Permissible Under US Constitution When:

1. Confinement takes place pursuant to proper procedures and evidentiary standards,
2. Finding of "dangerousness either to one's self or to others," and
3. Proof of dangerousness is "coupled ... with the proof of some additional factor, such as a 'mental illness' or 'mental abnormality.'

Kansas v. Crane, 534 U.S. 407, 409-10, 122 S.Ct. 867, 869 (2002).

Being unable to take care of oneself can constitute danger to self if "incapable of surviving safely in freedom." *Cooper v. Oklahoma*, 517 U.S. 348, 116 S.Ct. 1373, 1383 (1996).

Forced Drugging under US Constitution: *Sell*

Court Must Conclude:

1. Important governmental interests are at stake,
2. Will significantly further those state interests - substantially unlikely to have side effects that will interfere significantly (with achieving state interest),
3. Necessary to further those interests. The court must find that any alternative, less intrusive treatments are unlikely to achieve substantially the same results, and
4. Medically appropriate, i.e., in the patient's best medical interest in light of his medical condition, considered on drug-by-drug basis.

Sell v. United States, 539 U.S. 166, 177-8, 123 S.Ct. 2174, 2183 (2003) (Competence to Stand Trial Case).

Rights Violations

- No More than 10% of Psychiatrically Imprisoned (involuntarily committed) Meet Commitment Criteria
- No One Can Ever Properly be Drugged Against Their Will under *Sell* Criteria
 - Best Interests
 - No Less Intrusive Alternatives

Report on Improving Mental Health Outcomes, p 17.

PAIMI Act—Advisory Council Membership

42 U.S.C. § 10805(a)(6)

PAIMI Advisory Councils Shall Include:

- attorneys,
- mental health professionals,
- individuals from the public who are knowledgeable about mental illness,
- a provider of mental health services,
- individuals who have received or are receiving mental health services, and family members of such individuals, and

at least 60 percent the membership of which shall be comprised of individuals who have received or are receiving mental health services or who are family members of such individuals,

and

chaired by an individual who has received or is receiving mental health services or who is a family member of such an individual

PAIMI Advisory Council

42 USC § 10805(a)(6)(A)

“[The PAIMI Advisory Council] will advise [its Protection and Advocacy Agency] on policies and priorities to be carried out in protecting and advocating the rights of individuals with mental illness.”

PAIMI Act—Developing Priorities

42 U.S.C. § 10805(c)

(2) The governing authority established under paragraph (1) shall--

(A) be responsible for the planning, design, implementation, and functioning of the system; and

(B) consistent with subparagraph (A), jointly develop the annual priorities of the system with the advisory council.

Regulations

42 C.F.R. § 51.22

(a) Each P&A system shall have a governing authority responsible for its planning, designing, implementing and functioning. It shall, jointly with the advisory council, annually establish program priorities and policies.

42 C.F.R. § 51.23

- (a) Each P&A system shall establish an advisory council to:
- (1) Provide independent advice and recommendations to the system.
 - (2) Work jointly with the governing authority in the development of policies and priorities.
 - (3) Submit a section of the system's annual report as required under § 51.8.

Proposed Priority

Protect the rights of people to not be

1. psychiatrically confined, and/or
2. drugged or electroshocked against their will,

unless the constitutional, statutory, and judicial requirements for such massive deprivations of liberty exist, including the right to the least restrictive and least intrusive alternative, respectively.

Regulations

(Cont.)

42 C.F.R. § 51.23

(c) Each P&A system shall provide its advisory council with reports, materials and fiscal data to enable review of existing program policies, priorities and performance outcomes. Such submissions shall be made at least annually and shall report expenditures for the past two fiscal years, as well as projected expenses for the next fiscal year, identified by budget category (e.g., salary and wages, contract for services, administrative expenses) including the amount allotted for training of each the advisory council, governing board and staff.

42 CFR § 51.27 Training

A P&A system shall provide training for program staff, and may also provide training for contractors, governing board and advisory council members to enhance the development and implementation of effective protection and advocacy services for individuals with mental illness

Public Comment

42 USC § 10805

(a) A [Protection and Advocacy agency] shall -- . . .

(8) on an annual basis, provide the public with an opportunity to comment on the priorities established by, and the activities of, the [Protection and Advocacy agency];

42 C.F.R. § 51.24

(b) Members of the public shall be given an opportunity, on an annual basis, to comment on the priorities established by, and the activities of, the P&A system.

Procedures for public comment must provide for notice in a format accessible to individuals with mental illness, including such individuals who are in residential facilities, to family members and representatives of such individuals and to other individuals with disabilities. Procedures for public comment must provide for receipt of comments in writing or in person.

PAIMI Act—Annual Report

42 U.S.C. § 10805(a)(7)

The section of the annual “report” describing the activities, accomplishments, and expenditures [under the PAIMI Act] during the most recently completed fiscal year [shall be] prepared by the advisory council that describes the activities of the council and its assessment of the operations [under the PAIMI Act]”

Carpe Diem!

A scenic photograph of a sunset or sunrise. The sky is filled with soft, wispy clouds in shades of orange, yellow, and blue. In the foreground, the dark silhouettes of various trees, including evergreens and deciduous trees, are visible against the bright sky. The text "Carpe Diem!" is centered in the middle of the image, written in a bold, italicized, bright green font.
