No problem you will automatically get a copy but I wouldn't want you to be disappointed - the minutes won't say anything more than you have seen - they are, by virtue of legal request, very brief (one liners really)

Regards

JS

Thanks Janet. When available, I would appreciate having a copy of the minutes to complete my position paper and justification document.

Cheers,
Wayne

The minutes have been delayed more than usual (apologies) the decision was to take no action to change the CDS now and that you would record this in a position paper. OK ?
Regards

JS

Hi Janet.

Could you kindly share with me the decision of whether or not to add DM/hyperglycaemia to the Seroquel CDS?

Thanks.
Wayne

Thanks Janet. It was indeed a pleasure to have met you last week at SERM. I will speak with Chace to get the "inside" on how to access this database. A general question, did you or anyone else take notes on the Seroquel discussions at SERM? If so, could you please share them with me?

Thanks,
Wayne

Wayne - nice to meet you at SERM earlier this week I have now gone to honour my promise to get you access to the legacy database of around 4K discussion and justification documents and have just registered that you are based at Chesterbrook and you may in fact be faced with the same huge problems that Chace has just overcome - to avoid just setting off on the same troubled path I'll copy in Chace and Hilary Ramsden who have been closely involved to pass comment. It may in fact be more sense (in the short term) to ask for Chace's help in letting you get at the documents you may need through his new set up if you are close to each other ??

Regards
