**SECOND SUPPLEMENT TO RELATOR'S INITIAL
DISCLOSURES**

Pursuant to Fed. R. Civ. P. 26, *Relator* Dr. Toby Tyler Watson hereby serves these Second Supplemental Initial Disclosures. These do not constitute waiver of any work product protection and are without prejudice to any other issue or argument. *Relator* reserves the right to supplement disclosures as additional discovery and investigation is undertaken.

Witnesses

Kimberly Smithers
Pharmacy and Quality Section Chief
Bureau of Benefits Management
Division of Health Care Access and Accountability
Wisconsin Department of Health Services
608-266-9988, Kimberly.Smithers@wisconsin.gov

Ms. Smithers may be called to testify as to Wisconsin Medicaid drug coverage for prescriptions not for a medically accepted indication as defined under 42 U.S.C. § 1396r-8(k)(6), §1396r-8(g)(1)(B)(i).

Documents

1. Compendia

Under Fed. R. Civ. P. 26(a)(1)(A)(ii), a party must provide:

(ii) a copy--or a description by category and location--of all documents, electronically stored information, and tangible things that the disclosing party has in its possession, custody, or control and may use to support its claims or defenses, unless the use would be solely for impeachment

The drug references known as "compendia" for purposes of determining Medicaid coverage for off-label prescriptions are incorporated by reference in 42 U.S.C. §1396r-8(g)(1)(B)(i). This satisfies the requirement to provide a description by category and location.

Notwithstanding the foregoing, the Relator previously provided defendant with copies of the DRUGDEX monographs for the prescriptions identified in (a) paragraph 24 of the Complaint in this matter, Docket No. 1, and (b) Docket Nos. 46-1, 46-2, and 46-3 (Currently Identified Prescriptions). In addition, the location of a copy of the DRUGDEX Consult, Recommendation, Evidence and Efficacy Ratings is provided below. Relator is also providing below the location of copies of American Hospital Formulary Service Drug Information (AHFS) monographs for the Currently Identified Prescriptions.

With respect to the United States Pharmacopeia-Drug Information (or its successor publications), until recently *Relator* believed that publication had been discontinued and there was no successor. However, it has recently come to *Relator's* attention that DrugPoints, currently published by Truvex, previously published by Thomson Reuters, may be the successor publication. Unfortunately, the publisher has heretofore not been able to provide documentation to demonstrate this. Despite the uncertainty over DrugPoints being the successor publication to United States Pharmacopeia-Drug Information, the location of copies of DrugPoints monographs for the Currently Identified Prescriptions is also provided provided below, along with Appendix A, Strength of Recommendation and Evidence.

2. Medicaid Coverage for Prescriptions Not for a Medically Accepted Indication

The location of a copy of the Wisconsin Pharmacy Online Handbook, Claims: Drug Utilization Review, Topic #1978, A Comprehensive Overview is set forth below.

Since 1996 I have been the technical lead for forensic computer cases which have been handled by Bright Solutions Inc.

About Bright Solutions:

Bright Solutions Inc. is an Alaskan computer and Internet commerce consulting firm with a great deal of experience working in data recovery and conversion. In the past year our team has worked as an advisor and/or expert witness on approximately a dozen computer forensic examinations for a range cases involving digital evidence.

Over the years we have been involved as expert witnesses in a number of legal cases where we helped to collect and interpret the digital records. Bright Solutions has done contract work for the Federal Court System, Alaska State Crime Lab, Yakutat police, Whittier police, and St. Paul Police, Federal and State Public Defender offices in Anchorage, Palmer, Kodiak, Kenai and the Office of Public Advocacy and with many law firms. The staff has been through fingerprinting and background checks and have all signed non-disclosure agreements so that we have clearance to work in sensitive environments or with sensitive subjects.

I was first recognized by the court as an expert witness in my first of many cases in 1996 SOA vs. Michael Braddock, a former Anchorage Police Department officer accused of relations with a minor. After the case was settled, I was asked by Sergeant Casper to present a seminar on the proper handling of computer evidence for the APD. I was also asked to take a job with the Federal Bureau of Investigation based upon the work I did in that first APD case however I decided to remain independent since working as computer consulting across a wide variety of environments since it keeps expertise sharp. Over time my staff and I have assisted with legal cases in matters such as these:

- Acquisition of Forensic Digital Data
- Analysis of phone and email and network records
- Audio and video analysis & Enhancement
- Cell phone records
- Collection and Interpretation of GPS Information
- Corporate Disputes
- Digital Video
- Military Justice
- Public Defender cases such as Murder or child porn Defense

Anchorage Crime Lab support contractor
Ely Lilly Zyprexa – Analyze Medical adverse drug reactions

I have presented workshops regarding what every attorney should know about dealing with digital forensics to the Alaska Statewide Public Defender conference , Alaska Association of Paralegals and the Association of Certified Fraud Examiners. Bright solutions Inc. has also presented a session regarding cell phone forensics to The Anchorage Association of Trial Lawyers and at the Alaska Public Defenders Conference.

Please call me at 907-338-8188 if you have questions or would like to discuss working together. Generally we like to work on a retainer balance sufficient for up to 20 hours of work which can be replenished if needed as the case proceeds. My rate is \$150 per hour from dispatch to return and reimbursable expenses are at cost if paid within 10 days of the invoice.
